BEVERAGE MENU

BREWING Method

French Press

First Designed In 1929, This Simple, Filter-free Brewing Method Produces A Rich, Full-bodied Brew In About Four Minutes. Use Coarse Grounds To Prevent Bitterness this Also Keeps The Grounds From Slipping Through The Fine Mesh Of The Plunger

Turkish Coffee

Traditionally cooked on scorching hot sand in the Mediterranean, this coffee pot is now designed For the stovetop but still produces a dark, authentic brew full of strong flavor. A slow heating method is best; the coffee should foam rather than boil. When the coffee is ready, enjoy it black or cream for extra richness.

Drip Brew

Ideal for coffee office or on the go, this portable Brewer sits over your mug with a paper filter allowing the coffee to slowly drip through, producing a clear brewed coffee cup.

Chemex

With its simple elegant shape and patented brew process, the chemex eliminates oils, sediment and bitterness, resulting in a rich taste

Syphon

A vacuum Coffee makers brew Coffee using two chambers where vapor pressure and gravity produce coffee , this method produce a rich and smooth brewed Coffee concentrate
